

# Architecting trusted open data ecosystems: interoperability of data standards, technologies and methodologies

Risk management, interoperability and information standardization: XBRL, a commitment from the institutions and the financial sector

Interoperability and financial entities

17 November 2016

XBRL Spain | Spanish Business Register | Madrid

Michał Piechocki

Director at XBRL International Board of Directors  
Chairman of Frankfurt Group Technical Workshop hosted by the ECB

# Overview of EU initiatives and trends

- Solvency II
- AIFMD
- CRD IV (Basel II) / CRR
- EMIR
- ESEF
- MiFID II/MiFIR
- SHS
- MMSR
- AnaCredit

## Trends and directions:

- Dictionaries
- Identifiers and reference data
- Data ecosystems not siloses
- Granular data
- Accesibility to data (OpenAPIs)
- Analysis (network, big data)

- SFT
  - BSI-MIR
  - AMLD IV
  - IFRS
  - Integrated reporting
  - BCBS 239
  - T2S
  - ECB Statistical Data Dictionary & BIRD
  - European Reporting Framework
- 
- Unstructured data combined with structured
  - Trade repositories
  - New technologies (blockchain, DLT)
  - Combination of statistical and supervisory data

# Data ecosystems components

## Standards:

- ISO20022, FpML, FIX, MISMO, XBRL, DPM, RIXML, IFX, OFX, BPM6, SDMX, SDDS, MDDL, ACORD

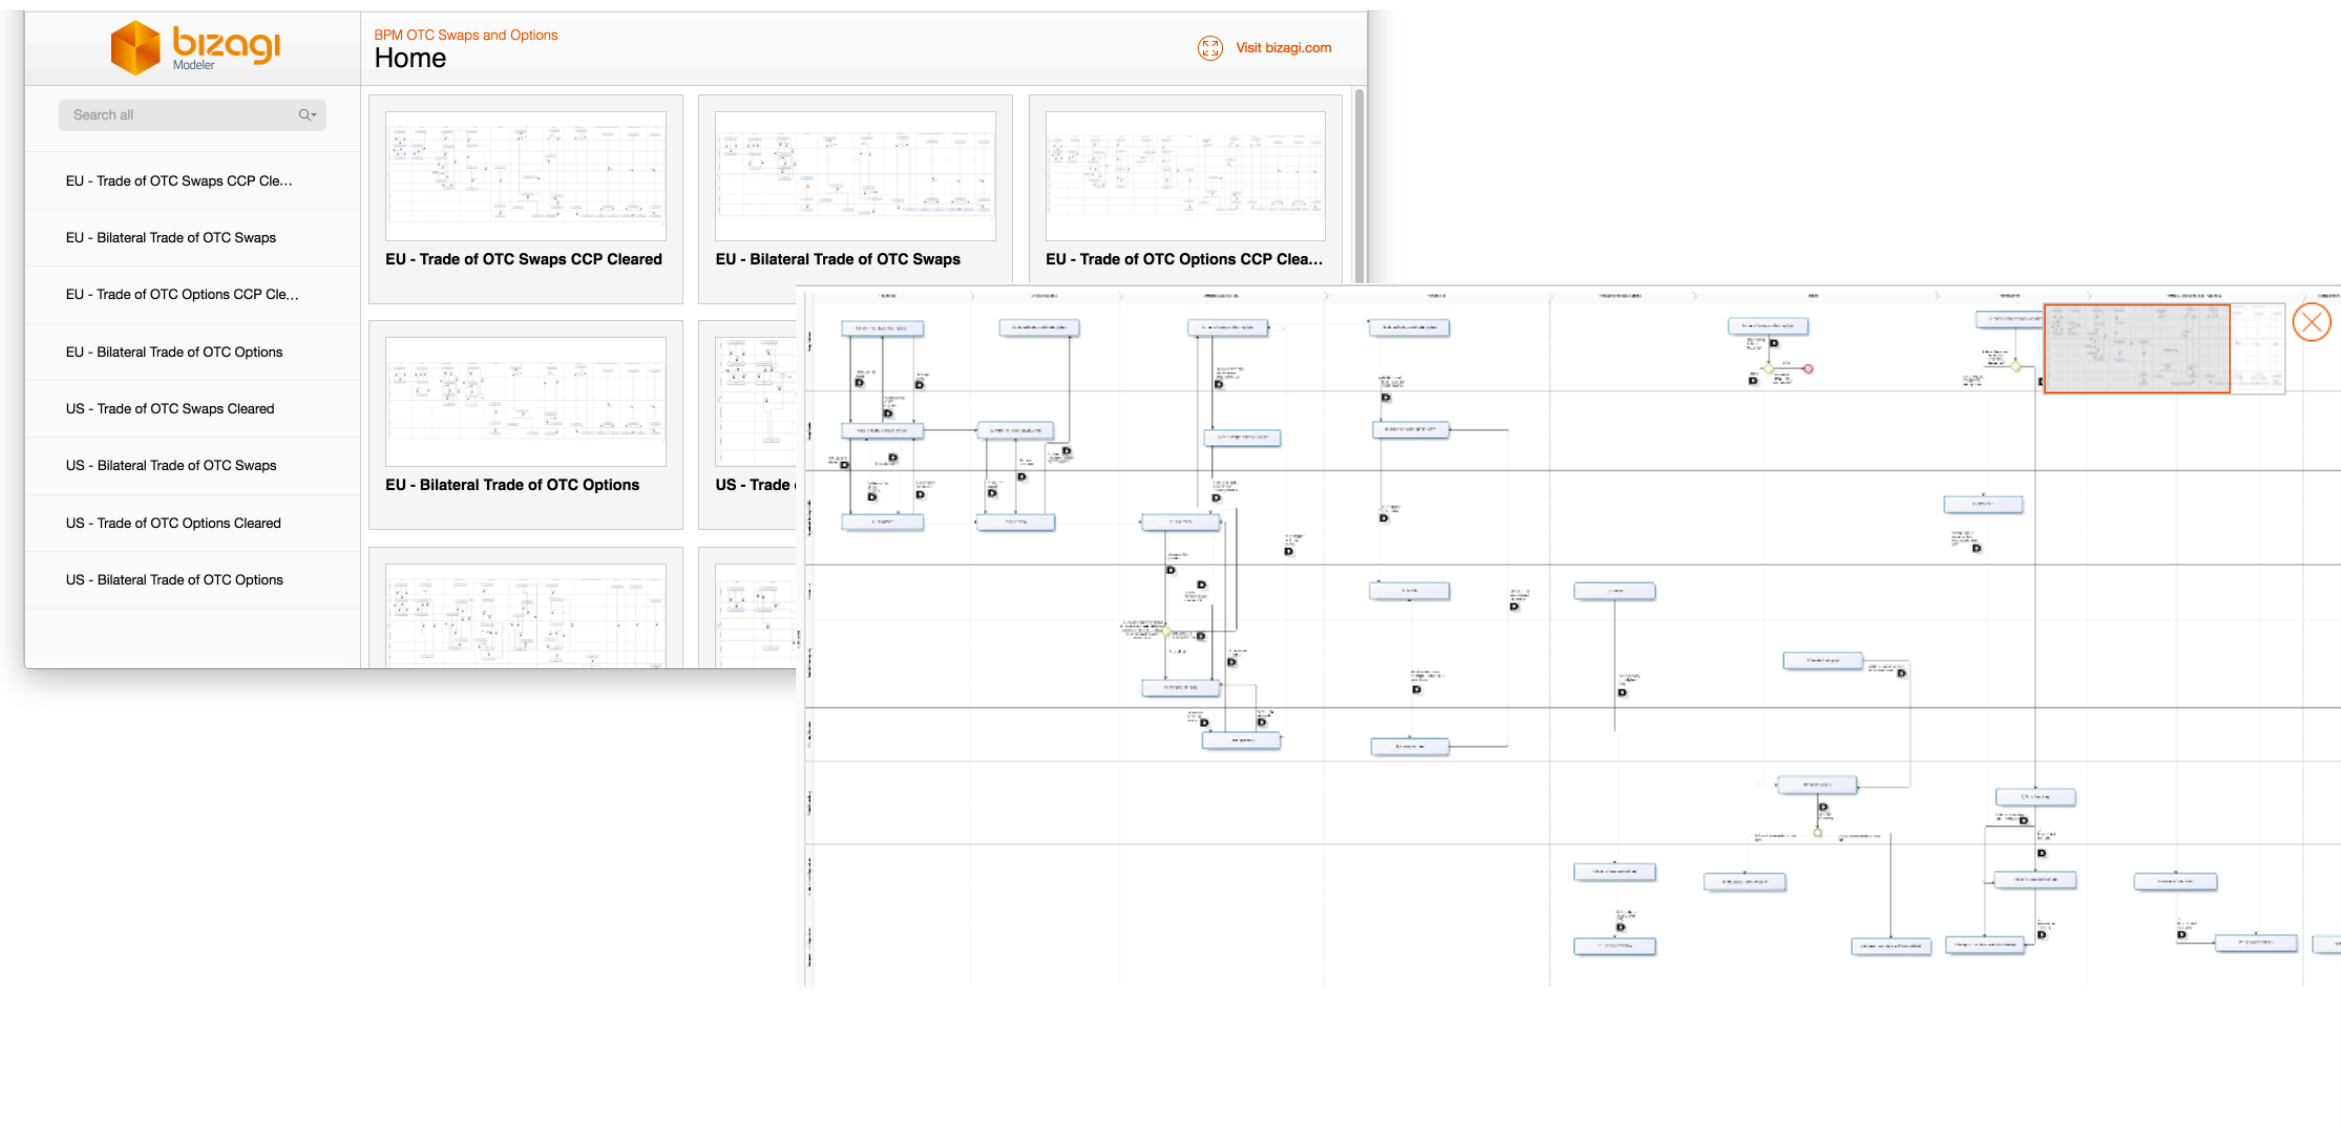

## Projects:

- FIBO, ACTUS, DPM2ISO, SMCube

## Identifiers:

- Product: UPI, ISIN (ISO 6166, ISO18774), Alternative Instrument Identifier, CUSIP, NSIN, FIGI (Bloomberg), RIC (Reuters)
- Entity: LEI (ISO 17442), MFI Code (ECB), IBAN (ISO 13616), BIC (ISO 9362), MIC (ISO 10383)
- Transaction: USI, UTI (CPMI-IOSCO, ISDA)

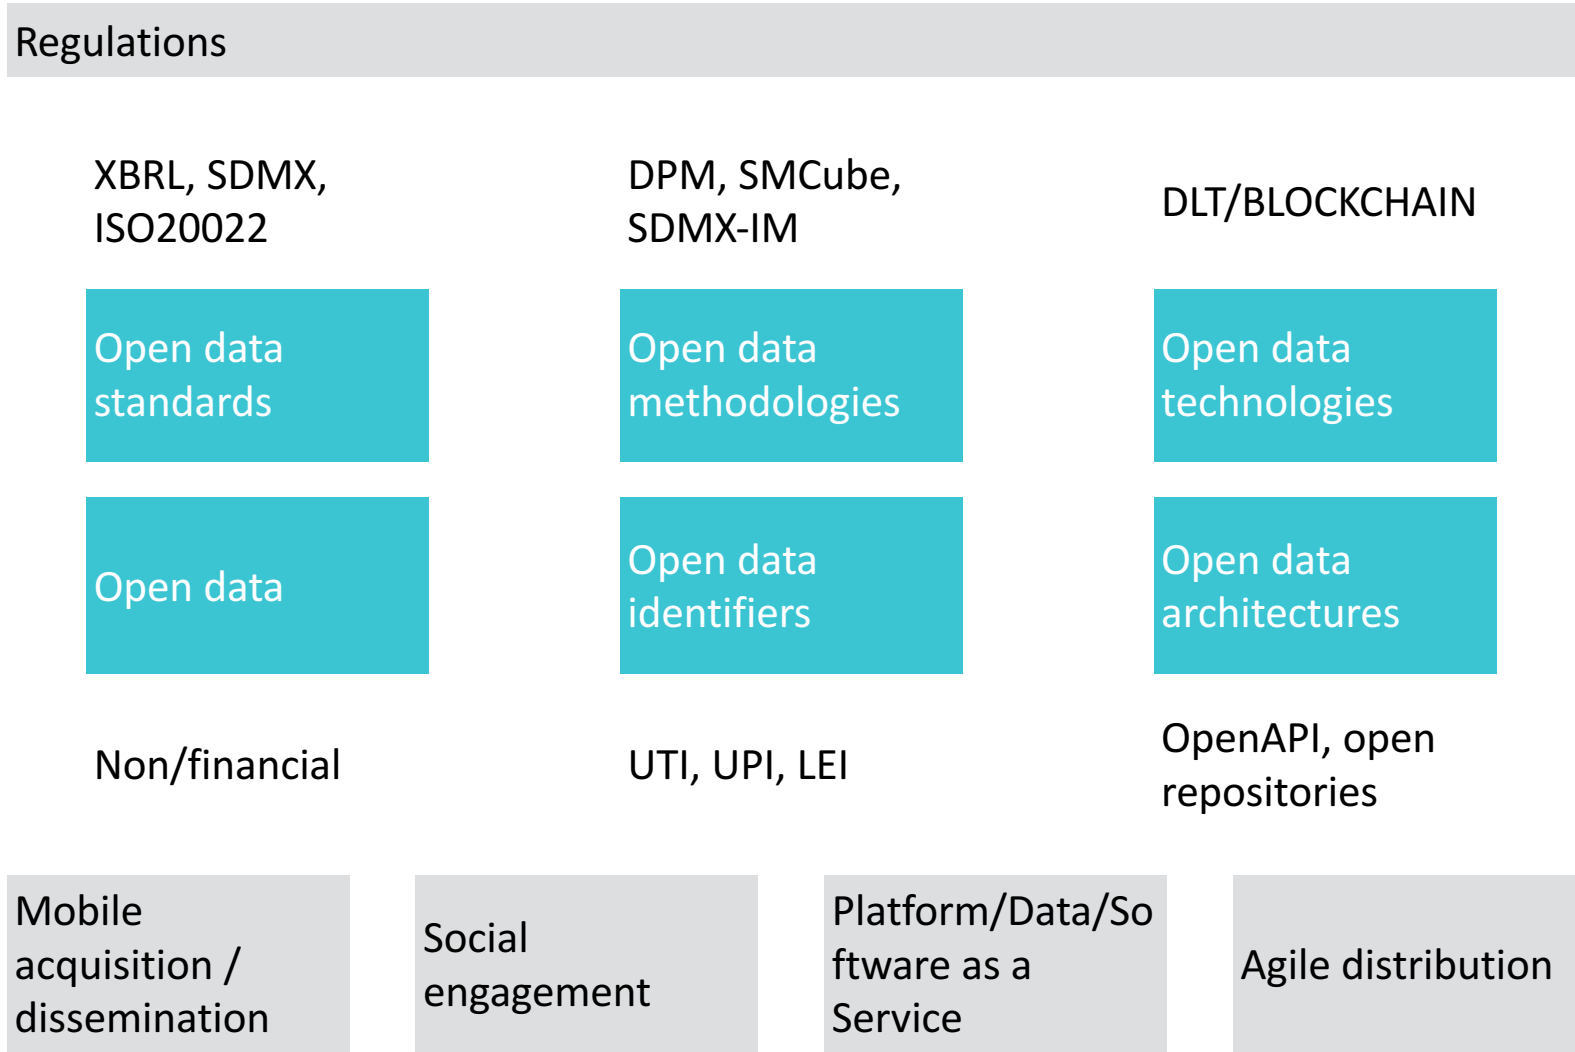

# Financial institutions data flows

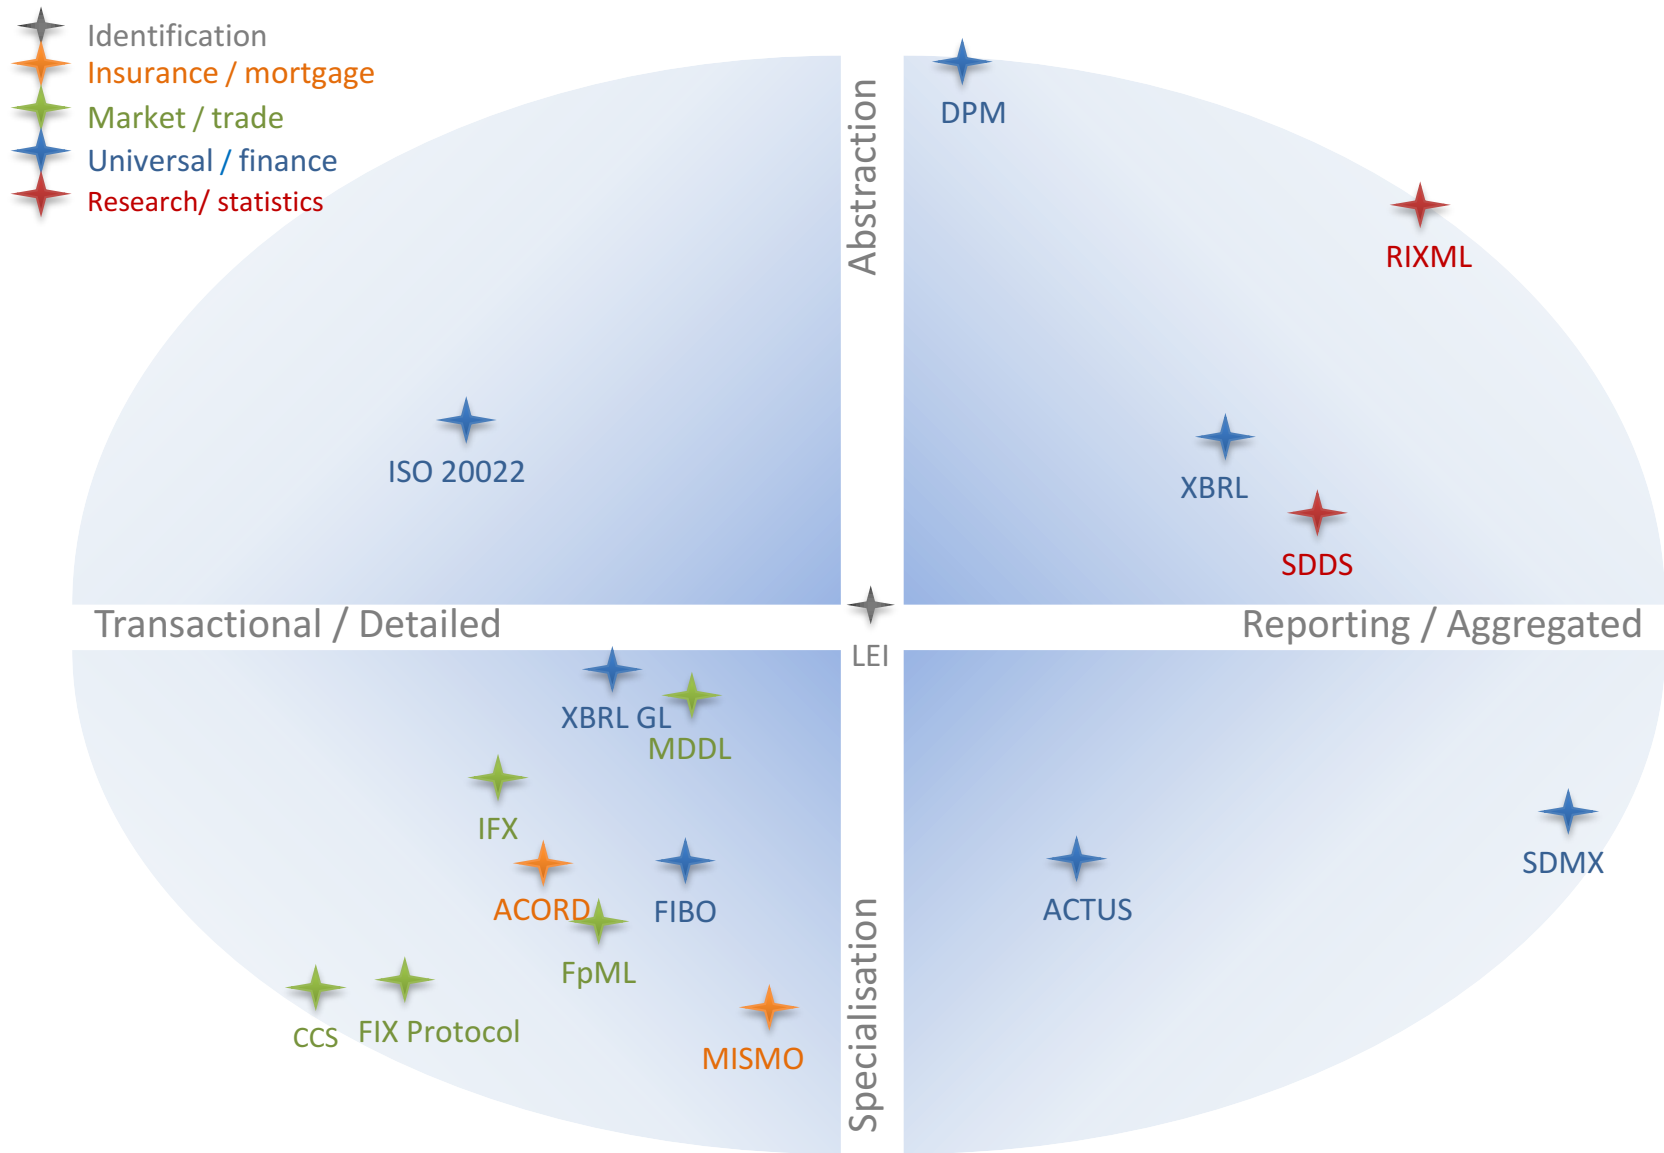

# Levels and connections of financial data ecosystems

	Past	Present	Future
Law: (data in regulations)	Local regulations	International standards	Single approach?
Logic: (data description, semantics)	Forms	Dictionaries, taxonomies	Ontologies?
Technology: (data exchange and processing, syntax)	Programs	Data standards XML-derivatives	Open APIs?
Repository: (data storage and source of data for analysis)	Files	Databases	Distributed ledger?

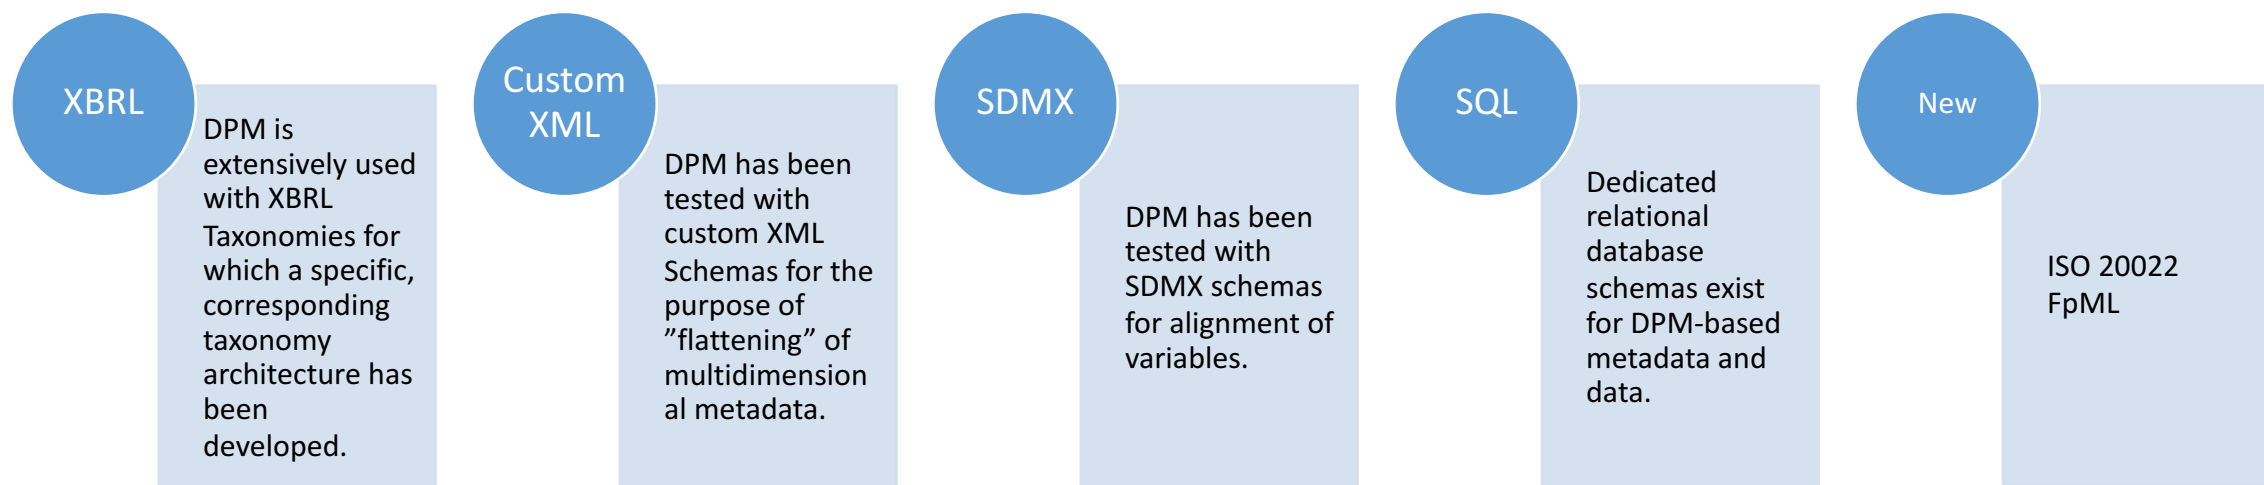

# Trusted Open Data Ecosystems

# Data Standards Map

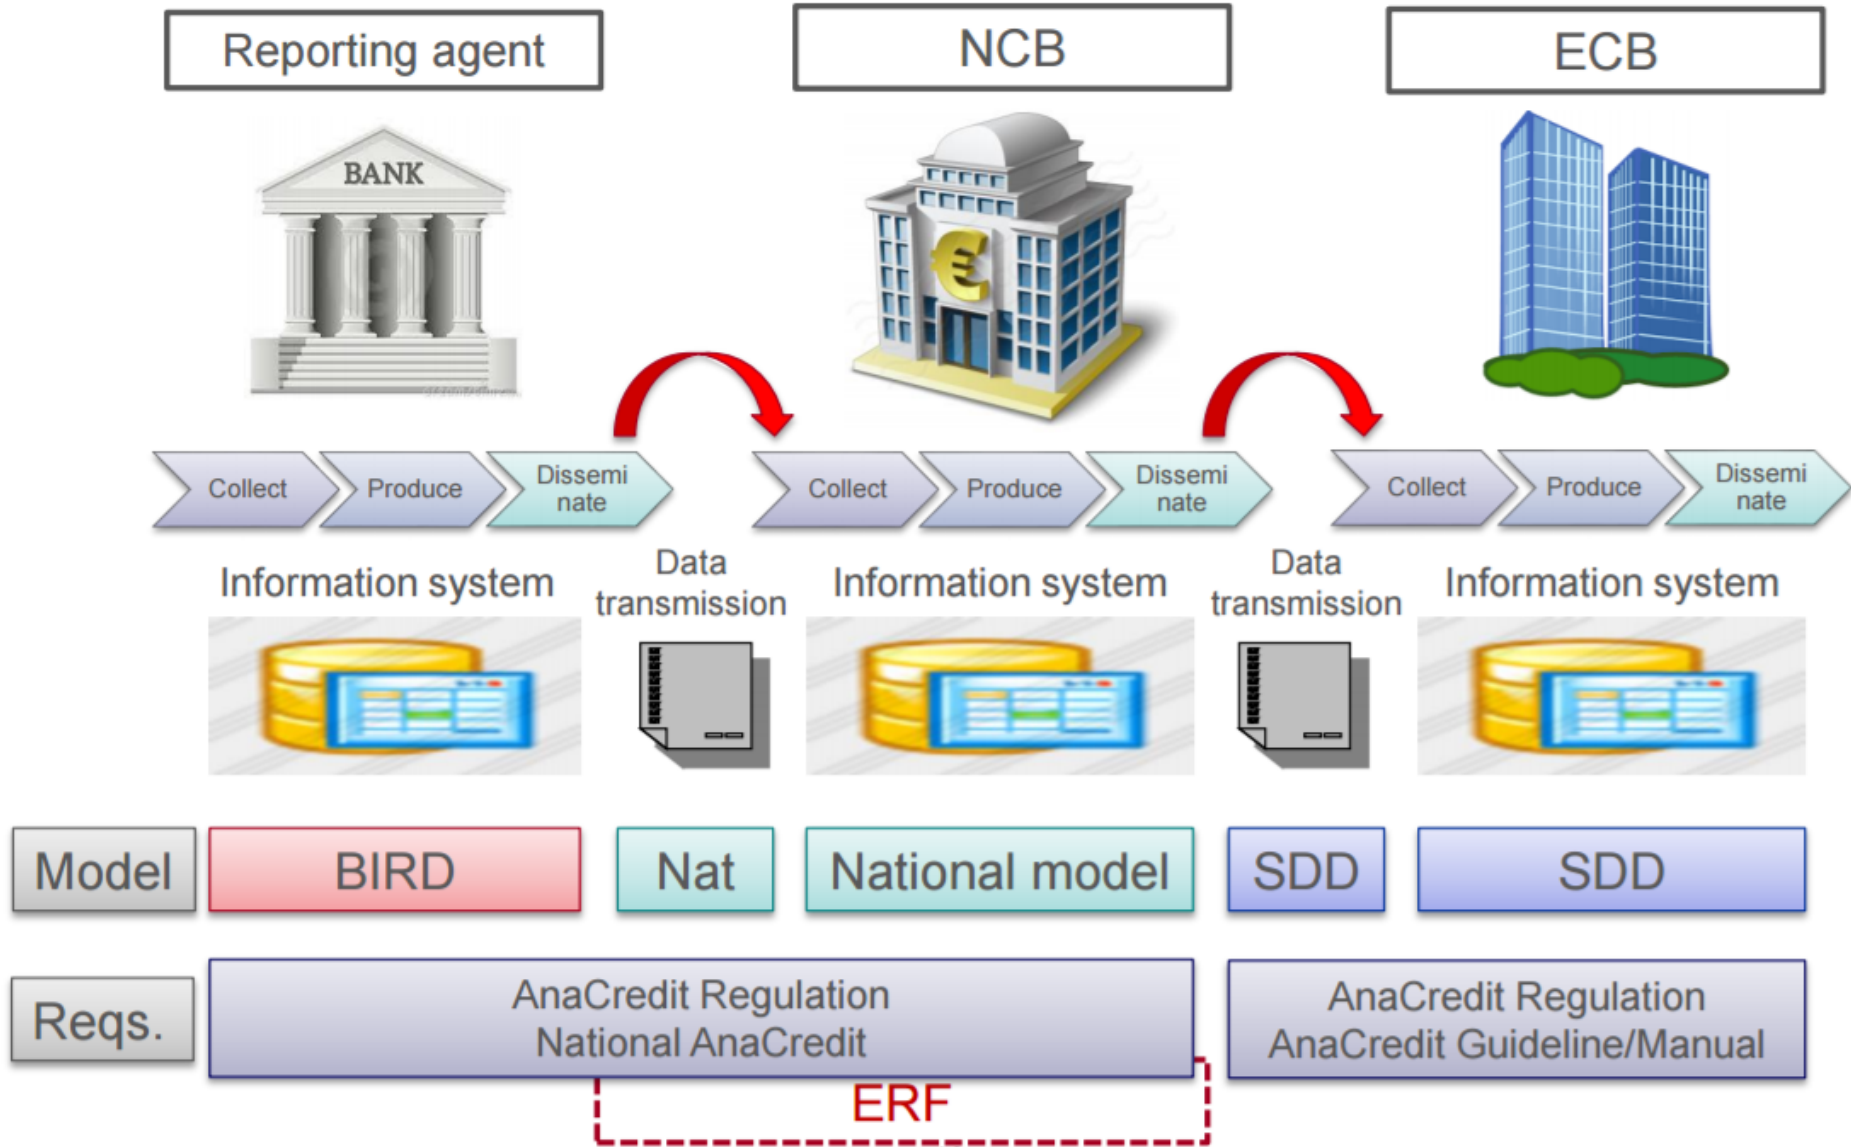

# Dictionaries (DPM) & interoperability with data technologies

# Interactions between BIRD, ERF and SDD (AnaCredit example)

Source: ECB

# Statistical Data Dictionary details

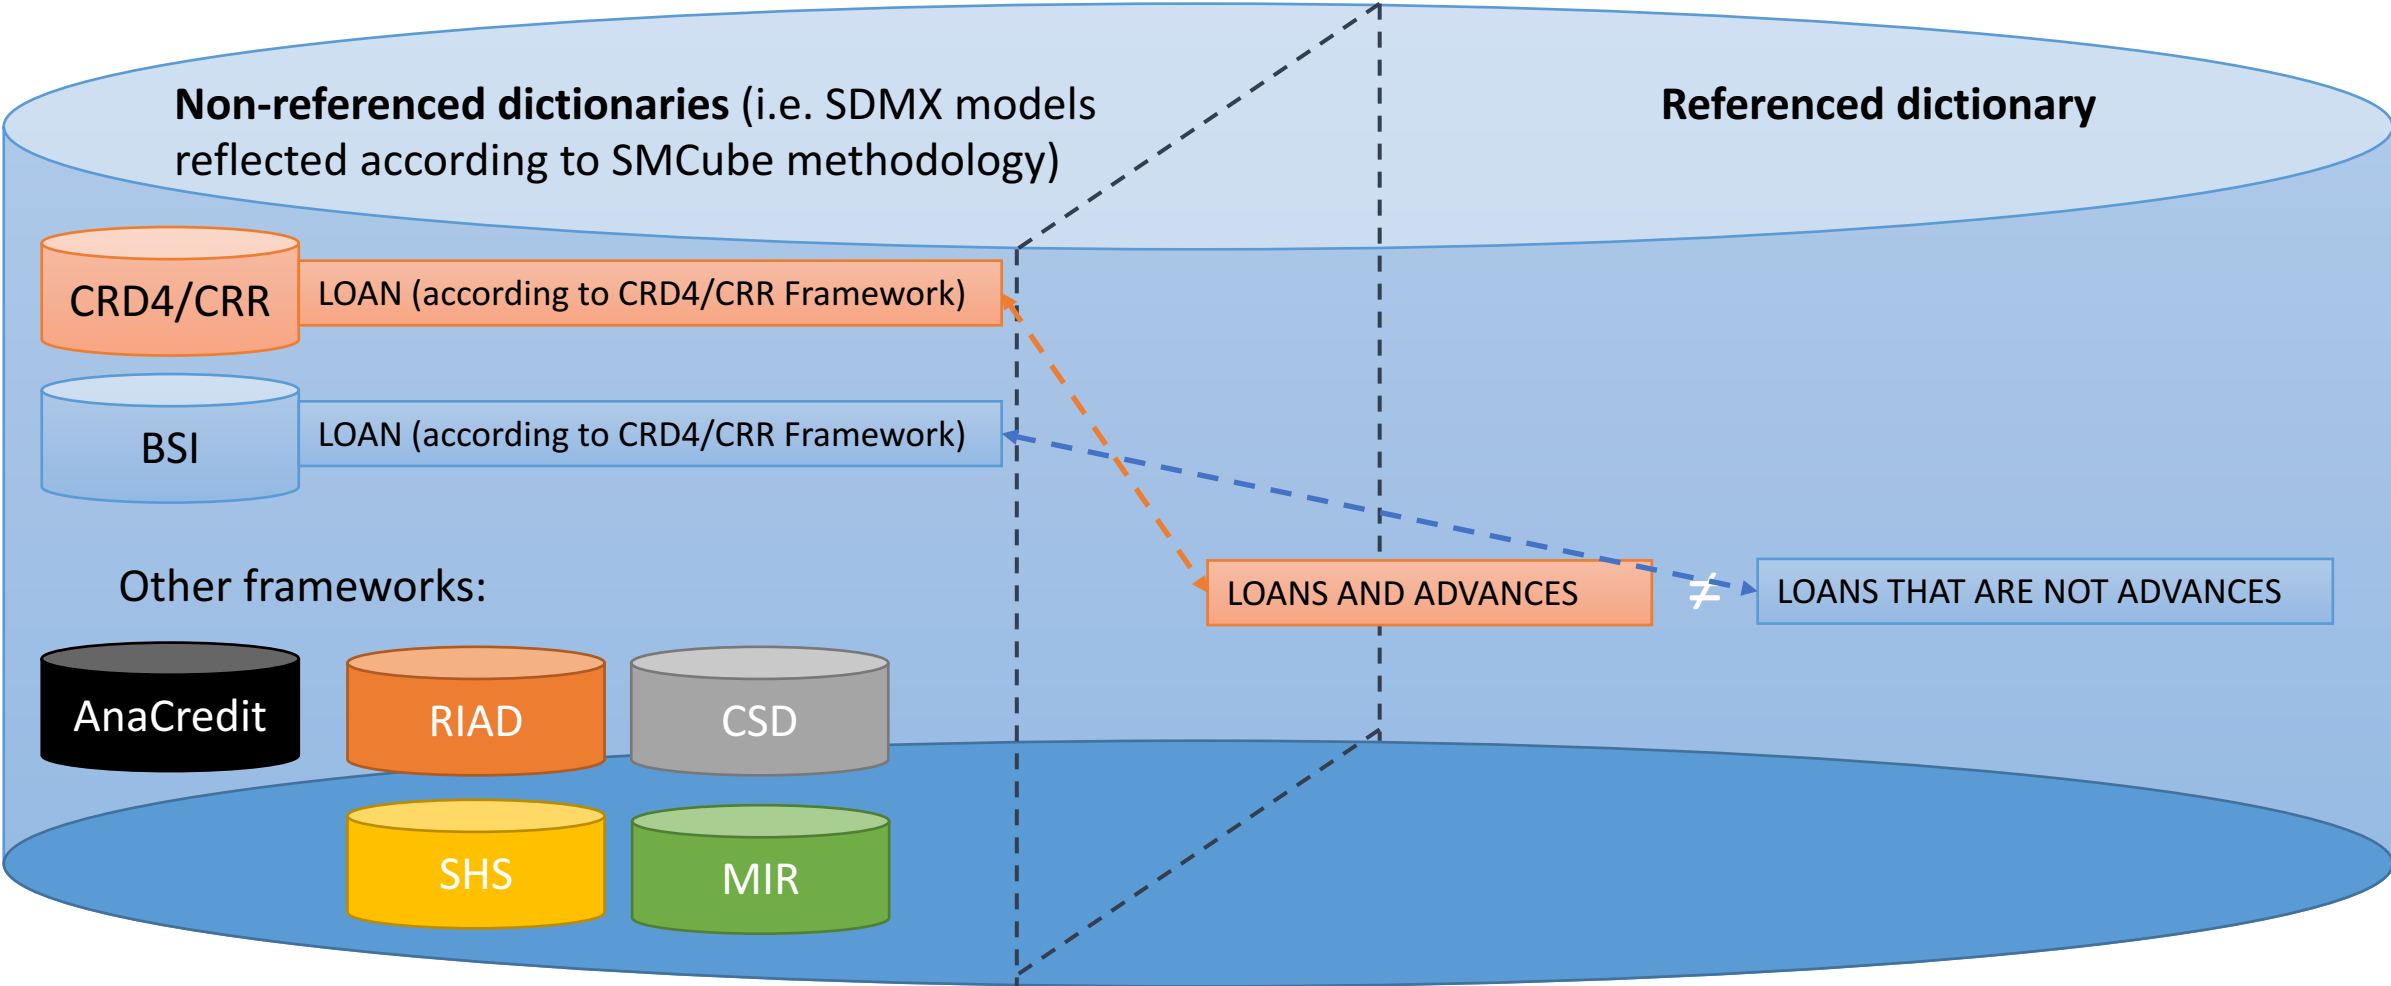

Methodological  
integration (common  
syntax for all the non-  
referenced dictionaries)

- Newly developed methodology (called SMCube) is in line with most material syntaxes used (DPM, SDMX)
- Relevant DPM and SDMX dictionaries are imported to SDD (constituting Non-referenced part of SDD)

Semantic integration (is  
the definition of „loan“  
the same for statistical  
and prudential  
frameworks?)

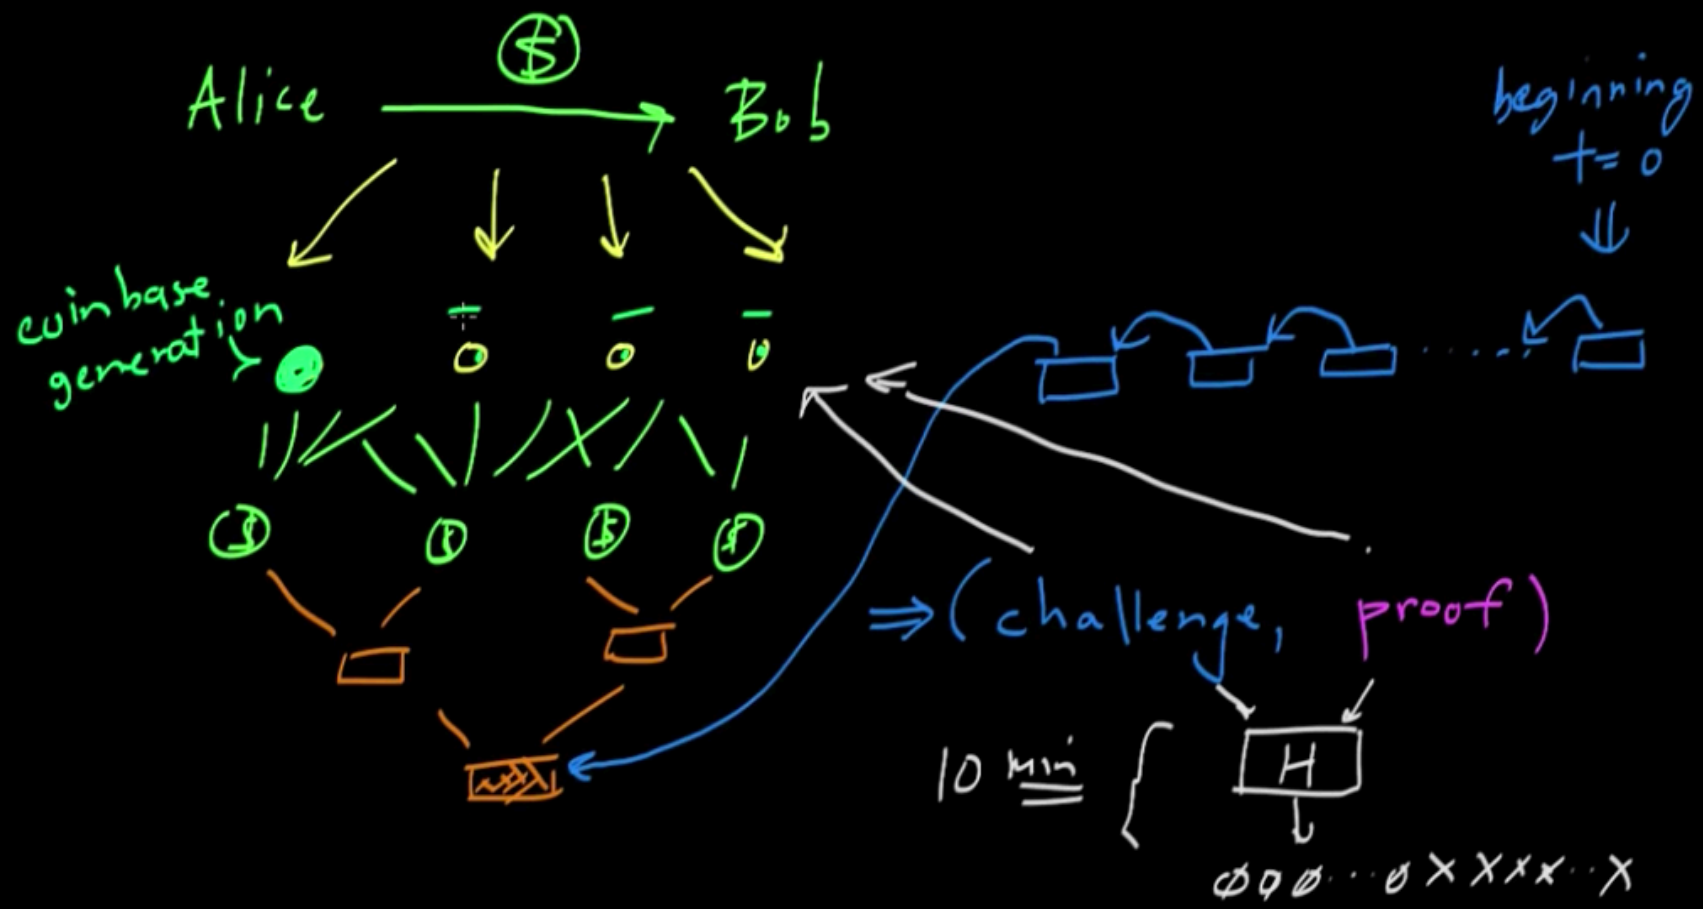

- Creation of referenced part of SDD dictionary
- Mapping between existing concepts from Non-referenced dictionaries and newly created concepts in Referenced dictionary
- Single Referenced dictionary being able to (i) reflect all reporting requirements and (ii) work as a „mapping layer between concepts from Non-referenced dictionaries

# SDD structure

# Technical introduction: blockchain & DLT

## Bitcoin Structures: Transaction Block Chains

# Thank you
